DATUM TECH QMS

In today's fast-paced Manufacturing Industry, quality management has become an essential aspect of any successful organization's strategic goal of Continuous Process Improvement (CPI). To maintain integrity to Datum's Quality Policy, the Datum Quality Management Team developed a vertically integrated "Datum Technologies Quality Management System App" (Datum Tech QMS App) as a comprehensive solution designed to help the Organization manage and maintain its quality management system effectively. The app is specifically designed to ensure that Datum can maintain the integrity of the Quality Management System certified to AS 9100 Rev D, as intended by IAQG.

Key features of the Datum Tech QMS App are the Quality Control Forms. These forms are designed to help the Organization ensure that products and services meet the required quality standards. The app includes: Request for Quote (RFQ), Purchase Orders (PO) Shipping and Receiving Forms, Non-Conformance Reports (NCR), Corrective and Preventative Action Reports (CAPA), Incident Reports, Human Resource Training Records Report, 2023 Master Tool Calibration Reports, Process Improvement Form, Approved Supplier List, Standard Operating Procedures forms (SOPS), Management Review Form, Internal Audit Form, Datum Quality Manual, etc.

The Production Control Schedule feature is another key component of the Datum Tech QMS App. This feature allows the Team to manage the production schedules and ensure that output is meeting the production targets. The app also includes customer management tools, reporting tools, and more, all designed to help Datum maintain integrity to the Quality Management System.

The Datum Tech QMS App is designed to be user-friendly and intuitive, making it easy to implement and use. The app is compatible with a range of devices, including smartphones, tablets, and desktop computers, ensuring that Datum Team members can access their quality management systems from anywhere, at any time. Additionally, the app is customizable, allowing the Quality Management Team to tailor it to ever changing needs and requirements.
